

August 16, 2011

Dear Math/Science/Technology Center Students and Parents,

Welcome back to the 2011-12 School Year. We are looking forward to a new year of excitement and challenges at the MSTC. The excitement stems from the new opportunities that will be provided as the Center continues to grow and evolve in a way that provides exceptional educational experiences while continuing to offer the value added programming that the local districts have requested. There is no doubt that the Center is facing real challenges as it experiences transitions. During this process, the mission does not change and the staff of the MSTC is committed to providing an exceptional and academically rigorous scholastic experience that prepares students for their futures.

The partnership between the MSTC and the MOCC that was developed last year will continue to be the mode of operation. This relationship will continue to grow and become an even larger part of the MSTC experience in ways that enhance an already great program. The resources of Ferris State University, the Math/Science/Technology Center, and the Career Center will be used to maximize student success in ways that were previously unavailable. Building and sharing resources together will bring new insight and advantages for both groups of students to explore STEM curriculum and prepare for careers that are emerging. The administration of the MSTC will continue to ensure that all programming is academically challenging and intentional in how it prepares our students to be competitive and gain an edge in a globally diverse market. We will continue to assist students and parents with any concerns regarding daily operations, procedures, and MOISD policies. Support staff and instructors are committed to top shelf service by partnering with students and parents in ways that provide knowledge of and access to resources and information.

If you have any questions, please do not hesitate to contact us at 231-796-5805.

Best wishes,

Jennifer L. Harrison, Ph.D.
MSTC Director

Mr. Steve Locke
MSTC Principal
